

Program 1

By: Joyash Shrestha
ACEM

Coding Journey Summary:

- 🕒 4 minutes 50 seconds of active typing | 12 minutes 47 seconds total duration
- 📄 503 characters | 30 lines
- ✂️ Typing speed: 28 character(s) per minute | Revisions: 58 (logging interval: 5 seconds)
- 🌐 Interactive version of this report is [available here](#).

Final Code

If the code contains more than one file, they are concatenated and shown.

==+=

FILE: Main.cpp

==+=

```
/* WAP TO CONVERT HOUR INTO OBJECT OF A CLASS TIME WHICH HAS MIN AND SEC AS MEMBER */
#include <iostream>
using namespace std;

class times
{
    int min;
    int sec;

    public:
    times()
    {
        min=0;
        sec=0;
    }

    times(int hr)
    {
        min=hr*60;
        sec=hr*60*60;
    }

    void display()
    {
        cout<<"min:"<<min<<"\nsec:"<<sec;
    }
};

int main() {
    int hour=3;
    times T1;
    T1=hour;
    T1.display();
    return 0;
}
```

Final Execution Output

Output of the most recent code execution.

```
min:180
sec:10800
```

Most Common Error

The most common error that occurred during the coding process; "null" (if any) indicates no errors.

EXCEPTION:

main.cpp: In function 'int main()':

main.cpp:30:9: error: expected ';' before 'T'

```
30 |     time T;  
   |           ^~  
   |           ;
```

main.cpp:31:5: error: 'T' was not declared in this scope

```
31 |     T=hour;  
   |     ^
```

Active Sessions

Active typing sessions while working on the task, shown as green bars.

Text Added or Removed Over Time

Green and red circles show text add and removed; size of the circle shows change in the number of characters.

Code Executions

Green and red dots correspond to successful and failed executions.

Typing speed can be negative when text is deleted.

Each edited line block is assigned a color; highlighted bars show the line(s) edited at that revision.
